

Project Mentor Seamless Integration with Microsoft Project

Gain experience as you learn

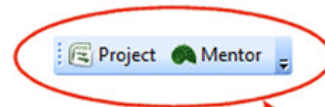

It's commonly agreed that people learn best by experience. So, what better way can there be to learn Microsoft Project, without having to leave its user interface?

Project Mentor provides this, as you can seamlessly switch between Lessons, References and Exercises whilst experiencing for real your results within Microsoft Project itself.

The best way to get to grips Microsoft Project - by experiencing as you learn.

- Switch seamlessly to and from Microsoft Project.
- Refer to practical and concise information at any time.
- Experience more and learn more.

9 Print invitations
10 Post invitations

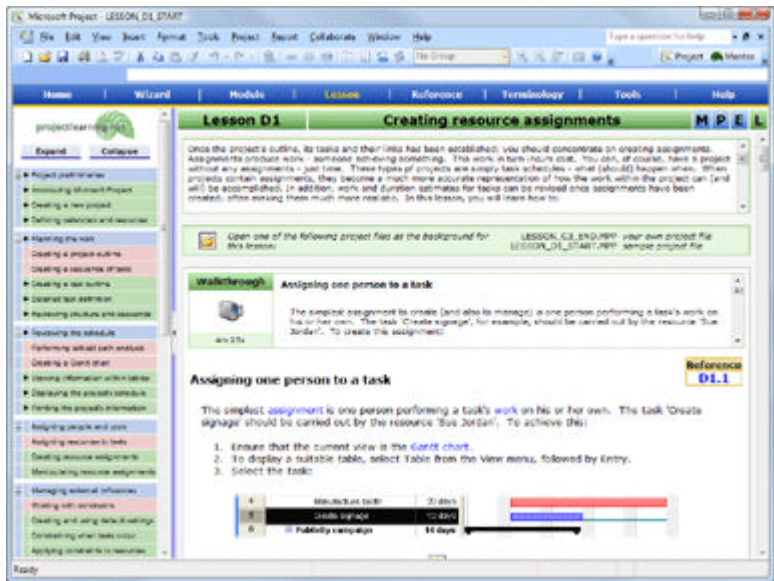

project solutions that make a difference

Listed below you'll see four simple steps that illustrate how you can switch effortlessly between Microsoft Project and Project Mentor without leaving the Microsoft Project user interface.

1

Step 1 - Switch from Microsoft Project to Project Mentor.

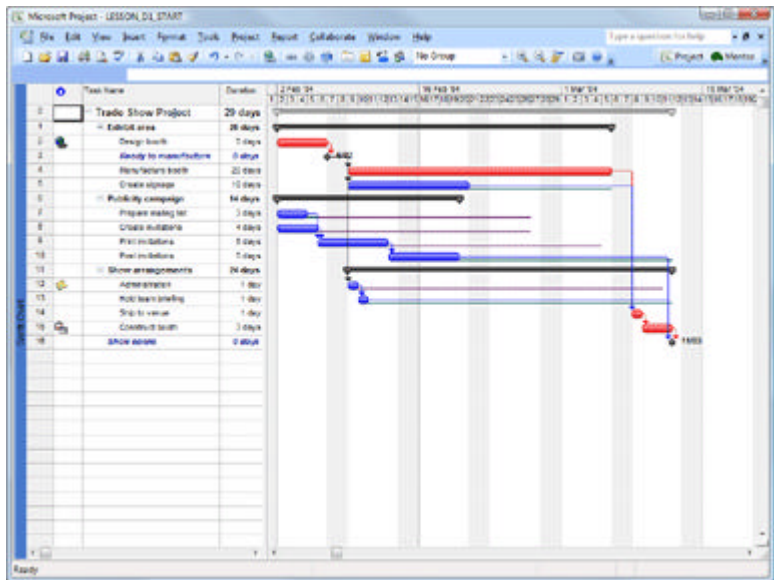

What could be simpler? You just start Microsoft Project, and then use a predefined toolbar to replace your Gantt Chart, Resource Sheet, or any other view with Project Mentor. You'll even go straight to the point where you left Project Mentor, with your progress clearly visible in the navigator pane to the left of Project Mentor's window.

2

Step 2 - Switch to Microsoft Project and open your sample data.

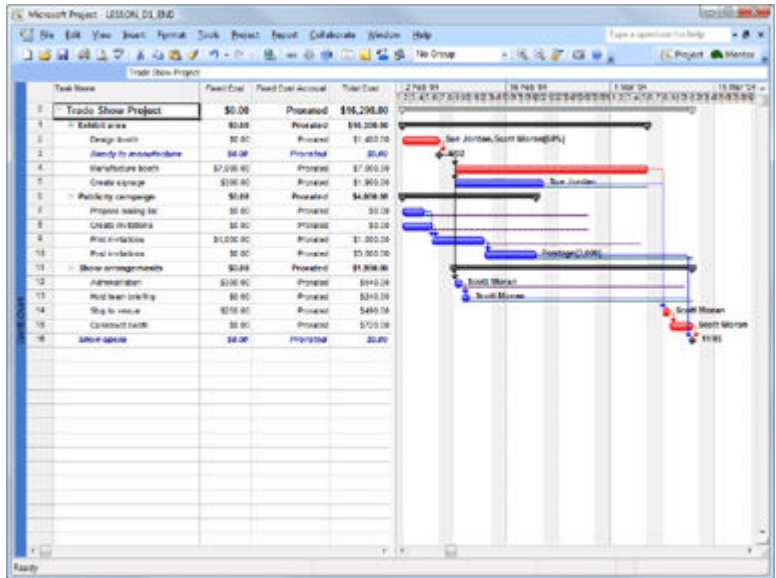

Just use the toolbar to switch back to Microsoft Project itself. Then, open your sample data and begin to learn, experiencing results for yourself - immediately.

Step 3 - Continue learning and experiencing.

3

Just follow Project Mentor's concise step-by-step instructions and experience the results for yourself as you use Microsoft Project.

Step 4 - Switch back to Project Mentor and check your progress for yourself.

4

To confirm what you've learned, just see the expected results within Project Mentor. By comparing specimen solutions with what you've achieved, you'll build up your skills and abilities, gaining valuable confidence in the process.
